-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on 21 October 2003.  
2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-14 is/are rejected.  
7) ☒ Claim(s) 15 is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☒ The specification is objected to by the Examiner.  
10) ☒ The drawing(s) filed on 21 October 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The EP Search Report listed on the submitted Information Disclosure Statement is not a proper listing for an IDS. The information has been considered by the examiner, but has been removed from the IDS.

### ***Specification***

2. The abstract of the disclosure is objected to because

It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.

Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 8, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Further, re-claim 2, "at least one hole" is indefinite since it is unclear if applicant is claiming the previously claimed hole of claim 1 or a new limitation.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 6-8 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Berger.

Berger discloses a friction lining segment (21) with a lock mechanism (4) arranged on one end and/or with a lock counter-mechanism (22) arranged on the other end characterized in that at least one hole (28) is provided in the vicinity of the lock mechanism and/or in the vicinity of the lock counter-mechanism. (Figure 6)

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berger.

Re claim 13, Berger does not teach wherein the counter-lock mechanism is cut essentially perpendicular to a fiber direction. It would have been an obvious matter of design choice to have aligned the fiber directions perpendicular to the counter-lock mechanism since applicant has not disclosed that having the fibers at any specific angle solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with the fibers at any angle.

9. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berger in view of Quigley.

Re claim 14, Berger does not teach wherein the friction plate has a carrier. Quigley teaches a friction lining with a carrier (11). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the carrier of Berger on the friction lining assembly of Berger in order to provide for a secure assembly of the disk in use.

#### ***Allowable Subject Matter***

10. Claims 3-5, 9-11, 14 and 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Art Unit: 3683

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ely, Bok et al., Burns, Robins et al., and Fujita teach segmented friction linings. Bortz and Kearsey teach a process for manufacturing a friction plate.
